Quelques pathologies remarquables de la mission 157
Some remarkable pathologies of mission 157

Remarque :

Ces pathologies, « historiques » parfois, ne sont en rien significatives de la réalité quotidienne et sont « négligeables » quantitativement au regard du nombre de consultations données sur une seule mission. Cependant, outre le suivi médical assuré par les 6 missions annuelles, elles confirment notre rôle de « SAMU aléatoire » par le caractère urgentiste de chacune de nos missions.

These pathologies, sometimes "historical", are in no way significant of daily reality and are "negligible" quantitatively in view of the number of consultations given on a single mission. However, in addition to the medical follow-up provided by the 6 annual missions, they confirm our role of "random SAMU" by the emergency nature of each of our missions.
